Click add video and upload a file in the effect panel

2. Adding other types of effects

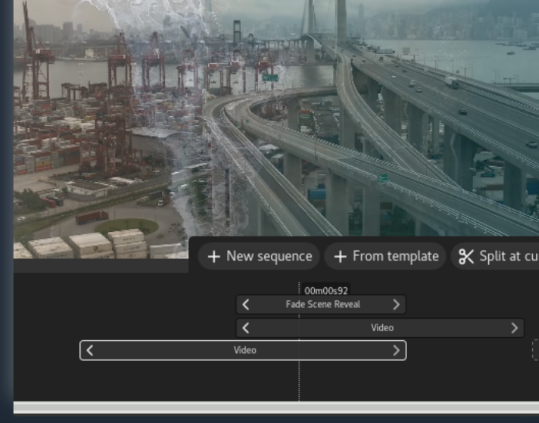

Add an empty sequence , place it and choose an effect

Making transitions

Transition effects and must be placed like above

2 other sequences

Add transitions above 2 overlapping videos

Example

Video sourcing tips...

Don't have videos to work with? Depending on your budget, search google for :

- Video stock footage
- Public domain video
- Free commercial video stock footage

Visit websites such as shutterstocks, which allows you to buy videos

Visit Pexels.com, as it provides free video footage under fair conditions

Lattefx is a powerful sequencer

Let's start editing !

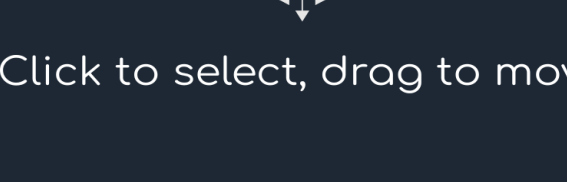

Removing time at start

Trim video

Moving and selecting

Click to select, drag to move

Removing time at end

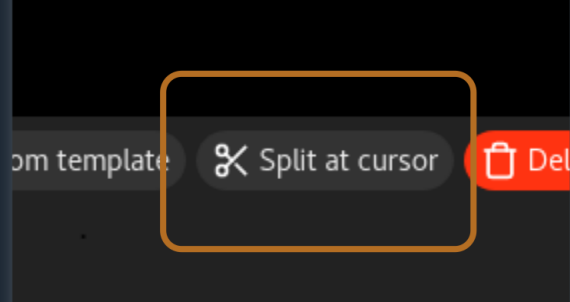

Adjust duration
